Saad Taibi

AI-Native Software Developer

Tangier, Morocco | saadhat10@gmail.com | saadhat.github.io | github.com/saadhat

PROFESSIONAL SUMMARY

I plan, build, test and release complete mobile and web products with AI coding agents. I define features, workflows and data structures; direct the agents; review and debug implementations; run QA; and manage deployment and production updates.

SELECTED PRODUCTS

Goalden Ball | Published Android football trivia game

Built and released a Flutter and Firebase football trivia game on Google Play, with eight competitive leagues, question ladders, collectible Icons, daily rewards, and leaderboards. AI agents: Cursor, Windsurf, Claude Code.

Confirmal | Live web application

Social-commerce operations platform for order capture, confirmation, delivery coordination, and cash-on-delivery settlement. Built with React, Vite, Express and Supabase; deployed at confirmal.com. AI agent: Codex.

Istighfar Counter | Android app, preparing for release

Free, ad-free and offline istighfar counter with volume-key counting, daily progress and local backups. Built with Kotlin and Jetpack Compose. AI agent: Codex.

Muslim Quest OS | In development

Local-first Muslim practice companion for prayer windows, Quran progress, daily quests and dhikr. Built as a React and TypeScript web/PWA project. AI agent: Codex.

EXPERIENCE

Independent AI-Native Software Developer | Dec 2024 - Present

- Own product scope, architecture decisions, data modelling, UX and feature prioritization across personal apps.
- Direct AI-generated implementation, integrate and review changes, debug issues, test critical flows and handle releases.
- Manage GitHub repositories, deployment workflows, Play Console publishing and ongoing improvements.

Translator & Scanlation Editor | 2023 - 2024

Translated Korean/Chinese comics into English; handled panel cleanup, redrawing and typesetting in Photoshop under deadlines.

Production Operator | Nov 2021 - Feb 2022

Operated production machinery and performed precision quality inspections.

TOOLS AND TECHNOLOGY

AI coding agents: Codex, Cursor, Claude Code, Windsurf. **Product workflow:** requirements, feature planning, UI design, AI orchestration, code review, integration, debugging, QA and release management.

Technologies used in projects: Flutter, Dart, Firebase, React, TypeScript, Kotlin, Jetpack Compose, Supabase, Git, GitHub, Google Play Console, Figma. These technologies describe project stacks, not claims of hand-coded proficiency.

EDUCATION AND LANGUAGES

Specialized Technician Diploma, Computer Networks (Bac+2) | 2013 - 2015

Languages: Arabic (native); English (advanced); French (intermediate).
